

## C3A specifications service

C3A forms the basis for tender specifications in Belgian tenders. By expressing your applications in the C3A system, you help prescribers to find a solution. ZeeBoer has been developing manufacturer-product specifications since 1984. With a C3A-system specification you support your customer in making a good choice. A specification service is in line with system thinking that construction requires.

### Utopis® Platform is not an average "PIM"

Utopis® Platform (UP) is the product information management system (PIM) for construction. UP is multi-deployable and distributes information from one central source. A system configurator in UP uses information that can also be used for other purposes. Think of documentation sheets, processing instructions, an advice tool, reference module or DoP generator.

Configure a solution with simple steps and choice support
